

Marian Buunk

The art lies under my skin ... In my life I made drawings and paintings and art has fascinated me in all its forms.

I like to tell something about the process of creating it.

A fascinating process that happens in my subconscious. In courses run by thinking and visual representations of color.

Commenting on my life so ... and who I am in all my commitment, joy and vulnerability brave by living and working in the middle of a society and a world where so much is happening.

This multitude of images and impressions divide into various spheres.

From the spirituality of Buddhism to an explosion of exuberance and color, silence and expression of nature.

The beauty of the human being in all his vulnerability my biggest inspiratiebron. ddhisme an explosion of exuberance and color, silence and expression of nature.

Sometimes I run just in stories; the mythology and make my tekeningen. Over love, beauty and adventure in a world that does not exist (anymore).

And my portraits.
